

Alec Mackay

Cranleigh, Surrey | 07503 947687 | 1alec.mackay@gmail.com | alecmackay.github.io

PROFILE

Second-year BA Product and Industrial Design student at Central Saint Martins (UAL), with coursework in sustainable and circular design, materials experimentation and systems thinking. Experience developing concepts from research through to CAD and physical prototyping, with a user-centred approach grounded in consumer insight and real-world testing. Currently building technical and commercial breadth through CAD, digital manufacturing and UX coursework. Seeking an industrial placement to contribute to sustainable packaging development within a cross-functional team.

EDUCATION

BA Product and Industrial Design — UAL, Central Saint Martins, London	09/2025 – present
Currently in 2nd year of study (2026/27)	
UAL Foundation Diploma in Art and Design — University of the Arts London	09/2024 – 05/2025
A-Levels — College of Richard Collyer, Horsham	09/2022 – 06/2024
English Literature (B) • History (C) • Mathematics (D)	
GCSEs — Dubai English Speaking College	2017 – 2022
11 GCSEs incl. English Literature (8), Business Studies (7), Media Studies (7), Spanish (7), Mathematics (7)	

RELEVANT COURSEWORK & CPD

- **SolidWorks 3D CAD for Education Specialisation** — Coursera, Dassault Systèmes *(in progress)*
- **Use Fusion 360 to Turn Your Ideas into Designs** — LinkedIn Learning *(in progress)*
- **Digital Manufacturing: Introduction and Smart Design** — Coursera, L&T EduTech *(in progress)*

DESIGN PROJECTS

Radia — Collapsible Firepit — UAL Foundation Diploma	2025
• Designed a collapsible, radial steel firepit built for longevity and portability, from primary research through to a hand-fabricated final product; selected for the UAL Archway Site Exhibition • Built scale models and renders in SolidWorks and Blender, then hand-cut, sanded, polished and bent steel to produce the finished piece	
Glowing Lily — CO₂ Sensor — CSM Project	2026
• Designed a screen-free, app-free air-quality device, grounding the concept in secondary research into CO₂ exposure thresholds and their effects on focus and wellbeing • Developed the full concept in Fusion 360 and Blender, producing a complete technical package of components, materials and dimensions ready for manufacture	
Living Habitat — CSM Project	2025
• Designed a multi-species birdhouse incorporating the foundations for a living roof, researching architectural precedents in sustainable and rewilding-led design • Took the piece from hand-drawn technical drawings through paper and cardboard scale models to a fully realised wooden prototype, built in an established workshop	

WORK HISTORY

Bartender — The Parrot Inn, Forest Green	07/2025 – present
• Front-of-house service, stock and equipment care in a busy pub environment	
Bartender — The Red Lion, Guildford	05/2025 – 07/2025
• Full bar service and customer-facing stock advice	
Bartender — Cranleigh Rugby Football Club	09/2024 – present
• Front-of-house service, opening/closing procedures and equipment care; balanced alongside full-time study and university rugby	

SKILLS

Design & Technical: Sketching, CAD (Fusion 360, SolidWorks), hand prototyping in wood and metal, technical drawing, materials experimentation, sustainable and circular design principles.

Consumer & Research: User-centred design, consumer insight gathering, UX fundamentals (Google UX Design cert in progress).

Teamwork: Collaborates across design, research and making on project teams; plays rugby for a university team alongside full-time study.

Time Management: Balances three concurrent front-of-house roles with full-time study at Central Saint Martins and university rugby.

Communication: Confident customer-facing communication across multiple roles; experience with public speaking and media interviews.

Risk & H&S Awareness: Practical understanding of hazardous environments and accident prevention from bar work and workshop machinery.

Full UK Driving Licence: No endorsements.
